192311087R8

CO5-AT3-Level-3
Level Exam Java 28 Aug 2026, 02:59 PM

Result Available
Your score: 100 / 100

QUESTIONS
Level 3 — HARD
Q1 Numbers
Q2 Control
2 / 2 saved

Level 3 — Hard (H) Perfect Squares — Numbers
Submitted
Write a Program to create a list of all numbers in a range which are perfect squares and the sum of the digits of the number is less than 10.
Sample Input & Output:
Enter lower range: 1
Enter upper range: 40
[1, 4, 9, 16, 25, 36]
Test case:
1. Enter lower range: 50
Enter upper range: 100
2. Enter lower range: 5
Enter upper range: 8
3. Enter lower range: 10
Enter upper range: 5
4. Enter lower range: 500
Enter upper range: 500
5. Enter lower range: 0
Enter upper range: -100
Testcase:

2. Total User: -145
3. Total User: 1026, Staff User: 1026
4. Total User: 450, Staff User: 540
5. Total User: 600, Staff User: 450

Your Code

```
1 import java.util.Scanner;  
2 public class Main {  
3     public static void main(String[] args) {  
4         Scanner s=new Scanner(System.in);  
5         int total= s.nextInt();  
6         if (total<=0) {  
7             System.out.println("You have entered 0");  
8             return;  
9         }  
10        int staff=s.nextInt();  
11        int nons=staff/3;  
12        int student=total-staff- nons;  
13        if (student<0) {  
14            System.out.println("No students");  
15        } else {  
16            System.out.println("Student Users: "+student);  
17        }  
18    }  
19 }
```

Output
Student Users: 698

The screenshot displays a web browser window with the address bar showing the URL: `simatslab.siveetha.com/practice_app/classactivity/level_exam_attempt/assignment_id=1783`. The browser's address bar also indicates "Not secure". The page header features the SIMATS Engineering logo on the left, the title "SIMATS Online Programming Lab" in the center, and the user's name "R HARSHA KYLE" with ID "19231100788" on the right. Below the header, the main content area is divided into two panels: "Your Code" and "Output". The "Your Code" panel contains the following Java code:

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner s = new Scanner(System.in);
5         System.out.println("Enter lower range:");
6         int l=s.nextInt();
7         System.out.println("Enter upper range:");
8         int h=s.nextInt();
9         System.out.print("[");
10        for (int i=l;i<=h;i++) {
11            int r = (int)Math.sqrt(i);
12            if (i*r==i) {
13                int n=i;
14                int sum=0;
15                while(n>0) {
16                    sum=sum+n%10;
17                    n=n/10;
18                }
19                if (sum<10) {
20                    System.out.print(i+", ");
21                }
22            }
23        }
24        System.out.println("]");
25    }
26 }
```

The "Output" panel shows the program's execution results:

```
Enter lower range:
Enter upper range:
[1, 4, 9, 16, 25, 36, ]
```
