```
System.out.println(100 / val);
}
```

Your Code

```
1 public class MultiCatchDemo {
2     public static void main(String[] args) {
3         try {
4             int val = 0;
5             System.out.println(100 / val);
6         } catch (ArithmeticException e) {
7             System.out.println("Math error");
8         }
9
10        try {
11            int x = 10 / 0;
12        } catch (ArithmeticException e) {
13            System.out.println(e);
14        }
15
16        try {
17            Object o = "text";
18            Integer i = (Integer) o;
19        } catch (ClassCastException e) {
20            System.out.println("Cast failed");
21        }
22    }
23 }
```

Input

stdin input

Output

```
Math error
java.lang.ArithmeticException: / by
zero
Cast failed
```
