

## Q5 - DELETE FILE IF EXISTS AND RECREATE

### SOURCE CODE

```
import java.io.File;
import java.io.IOException;

public class Q5 {
    public static void main(String[] args) {
        File f = new File("data.txt");
        try {
            if (f.exists()) {
                f.delete();
            }
            f.createNewFile();
            System.out.println("File deleted and created again");
        } catch (IOException e) {
            e.printStackTrace();
        }
    }
}
```

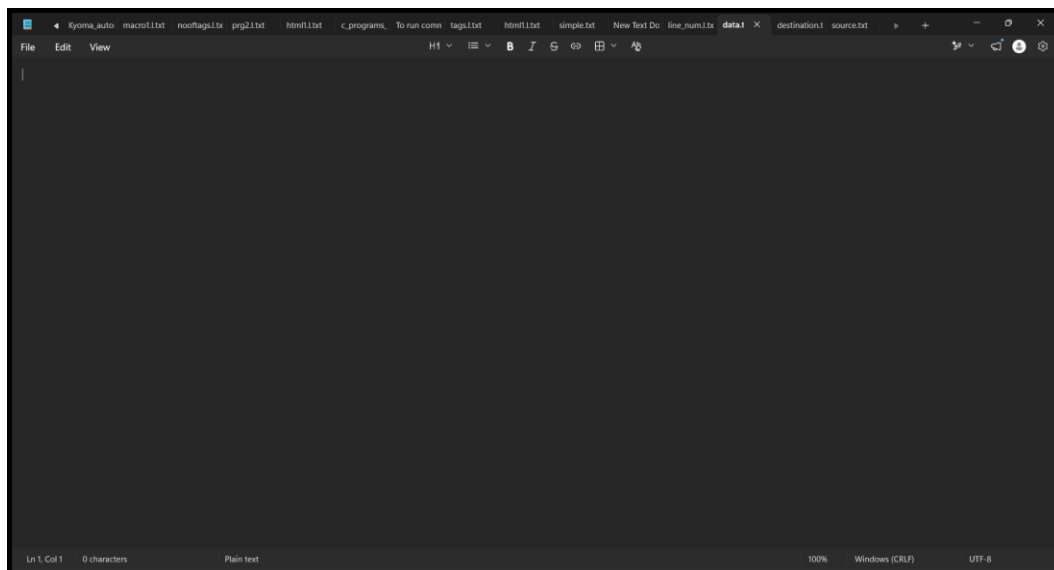

## PROGRAM OUTPUT

A screenshot of a console window titled "Q5 Console Output". The window has a dark background and a light-colored text area. The text area contains two lines of text: "File deleted and created again" and "c:\harsha studies\Java>". The window has standard Windows window controls (minimize, maximize, close) in the top right corner.

```
Q5 Console Output
File deleted and created again
c:\harsha studies\Java>
```

## FILE CONTENT (data.txt (empty after recreate))

A screenshot of a text editor window. The window has a dark background and a light-colored text area. The text area is empty. The window has a menu bar with "File", "Edit", and "View" options. The status bar at the bottom shows "Ln 1, Col 1", "0 characters", "Plain text", "100%", "Windows (CRLF)", and "UTF-8".

```
File Edit View
Ln 1, Col 1 0 characters Plain text 100% Windows (CRLF) UTF-8
```
