

Q2 - READING AND WRITING USING FILEREADER & FILEWRITER

SOURCE CODE

```
import java.io.FileReader;
import java.io.FileWriter;
import java.io.IOException;

public class Q2 {
    public static void main(String[] args) {
        try {
            FileWriter w = new FileWriter("data.txt");
            w.write("Hello World");
            w.close();
            FileReader r = new FileReader("data.txt");
            int c;
            while ((c = r.read()) != -1) {
                System.out.print((char) c);
            }
            r.close();
        } catch (IOException e) {
            e.printStackTrace();
        }
    }
}
```

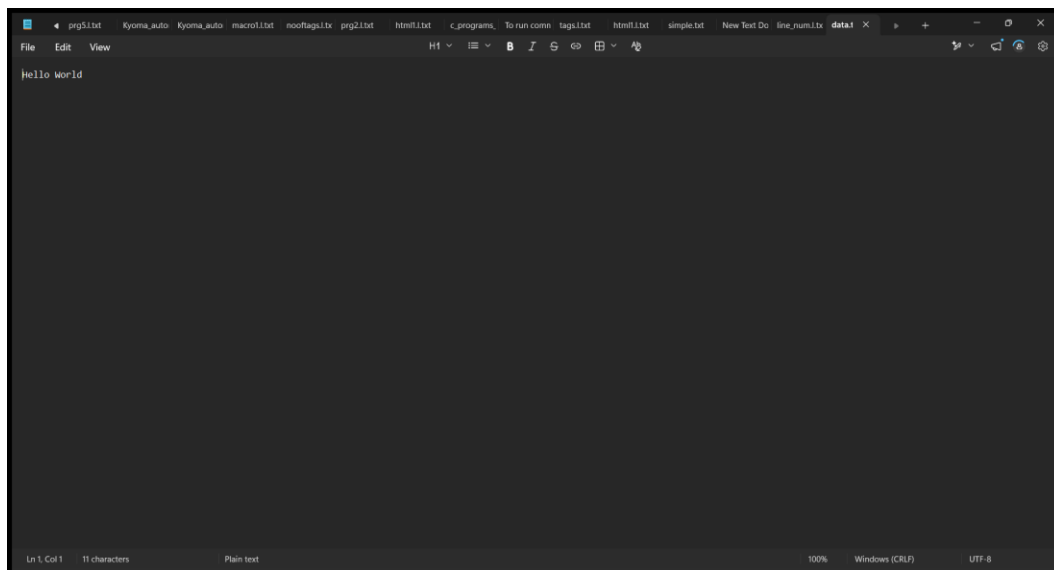

PROGRAM OUTPUT

A screenshot of a console window titled "Q2 Console Output". The window has a dark background and a light-colored text area. The text "Hello World" is displayed on the first line, and the command prompt "c:\harsha studies\Java>" is on the second line. The window has standard Windows window controls (minimize, maximize, close) in the top right corner.

```
Q2 Console Output
Hello World
c:\harsha studies\Java>
```

FILE CONTENT (data.txt)

A screenshot of a text editor window with multiple tabs. The active tab is "data.txt". The text "Hello world" is visible in the editor area. The editor has a dark background and a light-colored text area. The status bar at the bottom shows "Ln 1, Col 1", "11 characters", "Plain text", "100%", "Windows (CRLF)", and "UTF-8".

```
data.txt
Hello world
```
